## The Reading Challenge

Some children did a reading challenge. They recorded how many books they read.

1. Miguel read 7 books. Mia read the same number of books as Miguel. Write and solve the number sentence to show how many books Miguel and Mia read in all.

$$7 + 7 = 14$$

2. Abdul read 8 books. Jose read 11 books. How many more books did Jose read than Abdul?

3 books

3. Estela read 23 books last month. She put the books onto three shelves. Each shelf has a different number of books.

Write a number sentence to show how many books might be on each shelf.

Possible answers are shown.

$$7 + 12 + 4 = 23$$

Middle-of-Year  
Performance Task

Franco read 22 books. Tia read 15 books. Ali read more books than Tia but fewer than Franco.

4. How many more books did Franco read than Tia? Use the number line to solve.

7 books

5. How many books could the 3 children have read in all? Write a number sentence.

Possible answers are shown.

$$22 + 15 + 18 = 55$$

Explain your answer.

I know that Franco read 22 books. I know that Tia read 15 books. Ali could read

18 books because 18 is more than 15 but less than 22.  $22 + 15 + 18$  is 55.

Middle-of-Year  
Performance Task

6. Erica read 31 books. Her friend Molly read 17 books. Draw a quick picture to show how many books Erica and Molly read in all.

**Check children's drawings.**

They read **48** books in all.

2. Serena read a book that is 38 pages long. Ming read a book that is 26 pages long. Rohan read a book that is 31 pages long.

Ming finds how many pages he and Rohan read in all. How many more pages did they read than Serena?

They read **19** more pages than Serena.

Explain how you know your answer is correct.

**Possible answer: Ming and Rohan read  $26 + 31 = 57$  pages in all.**

**57 is 19 more than 38.**
